

# Glow stick lanterns

You will need:

- empty milk cartons
- glow sticks
- water
- black marker

These spooky lanterns are really easy to make and will look great on your doorstep on Halloween night.

Firstly clean out your old milk cartons and remove any labels. Next, draw scary faces on the largest sides with marker and fill with water.

Pop your glow sticks, drop one or two into each milk carton and they are ready to display by your front door.

You can also try glow-in-the-dark bowling - just use plastic drink bottles instead of milk cartons and have a go once it's dark.
